Harriston

Cup Planter

- **Rigid Row Unit:** Prevents seed from falling off cup due to opening shoe movement.
- **Floating Shoe:** Provides consistent seed depth, adjustable for different field conditions.
- **Short Seed Drop:** Assures the best seed spacing accuracy possible in a cup planter.
- **Positive Bowl Feed System:** Switch activated, maintains even seed bowl height, unlike gravity systems. Allows more uniform feeding of cups.
- **Harriston Hydraulic Drive:** Simple on-the-fly adjustments with dry fertilizer integrated, eliminating the need for multiple displays.

Options

Opening Shoe Options
